REFERENCES AND PACKAGING

	REFERENCE
1 L BOTTLE	4230.001
20L CAN	4230.020

COMPOSITION

S-methoprene 0.5% • EC=613-834-0 / CAS=65733-166.
Chrysanthemum cinerariaefolium, extract of open and mature *Tanacetum cinerariifolium* flowers obtained with supercritical carbon dioxide 0.25 % • EC = 289-699-3 / CAS = 89997-63-7. Pyperonyl butoxide 5 % • EC=200-076-7 / CAS = 51-03-6.

STORAGE

Store the product in its original packaging, upright and in a cool, well-ventilated area.

- Storage in the original closed packaging: 2 years from the date of manufacture.
- Storage once opened: 2 months from the date of opening.

INSTRUCTIONS FOR USE

- 1 Follow the instructions for use of the **Nocotech** spraying device (see instructions for use and quickstart document).
- 2 Shake the bottle before use.
- 3 Screw the 1 L bottle into the **Nocospray** spraying device or the 20 L can into the Nocomax **spraying device**.
- 4 Remove the mattress from the bed and highlight any areas that are difficult to access.
- 5 Clean all fabrics, bedding and exposed structures (with a steam system if possible) where bedbug eggs may be deposited and then vacuum carefully (with a Hoover).
- 6 Apply the product to all corners of the bed using the sprayer provided.
- 7 Leave the mattress on its edge and then start processing the room.
- 8 Set the volume (V) of the room multiplied by 2.
- 9 When the spraying is completed, follow a contact time of 2 hours and then ventilate the room for 10 minutes.
- 10 Remove the bottle after use and close it again. Preventive maintenance treatments should then be carried out every 6 weeks.

IMPORTANT

- Throughout the operation of the machine and the contact time, keep the room closed and do not enter it. The treatment must be performed away from humans.
